

Press Release Newcomer @ Passenger Terminal Expo

IEE presents innovative vision sensing applications for airport safety and security

Luxembourg, 11th April 2008 – IEE, the internationally renowned Luxembourg sensing specialist, presents its innovative vision sensor at this year's Passenger Terminal Expo, which takes place from 15th – 17th April in Amsterdam (IEE stand: 1512).

The sensor offers 3D vision applications for airport safety, security and surveillance, such as Precision People Counting, Single Person Detection, Child Detection and Luggage Classification. It is the first time ever that IEE presents the vision sensor for this application at a trade fair. Stand visitors can take part in the Accurate People Counting demonstration, in which the vision sensor monitors a designated zone in the stand and provides statistics about the number of people going in and out, their height, etc.

In comparison to 2D or thermo-based solutions on the market, IEE's vision sensor offers extremely reliable data outcome. The technology is based on the IEE patented 3D-MLI SensorTM, which uses modulated infrared light to obtain a 3D image of the monitored area and is not influenced by temperature or light.

Paul Schockmel, IEE's Strategic Marketing and Communication Director, comments: *"We are very excited to show our vision sensor at Passenger Terminal Expo. Our participation is a key element in our market diversification strategy. We have gathered extensive experience in the automotive industry, developing safety sensing solutions for car occupant detection and classification, and the step towards applying our know-how to the airport industry is a logical one. With our presence at PTE, we are confident to intensify the foothold we have gained in this industry so far and we are eager to show that our technology offers added value to the industry and its solution providers".*

About IEE

IEE is an innovative developer of specialized sensing systems. Founded in 1989 and headquartered in Luxembourg, the company has operations in Europe, the US and Asia. IEE is also a global leader in automotive safety sensing systems for occupant detection and classification. The company's solutions are dedicated to the following markets: Transport, Public & Commercial Infrastructure, Automation & Logistics and Medical & Healthcare.

IEE employs over 1,200 people worldwide. 26% of the company's workforce is engaged in Research and Development. For more information, please visit www.iee.lu.
