

IEE Launches Innovative Tailgate Detection and People Counting Solutions at IFSEC

Luxembourg, April 2010 – IEE, internationally renowned Luxembourg sensing specialist, presents its tailgate detection and people counting sensing systems at this year's IFSEC, which takes place from 10 to 13 May in Birmingham's NEC (Hall 4, booth D152).

3D MLI Sensor™

IEE's Single Person Detector is a tailgate detection solution for access-controlled entrances such as single-door entrance points, mantraps or airlocks. Based on 3D MLI Sensor technology, it accurately singles out people and helps to prevent tailgating and piggybacking. Easily integrated into existing access control systems, the Single Person Detector sends a signal to lock or unlock the door depending on the presence of one or more persons, thereby adding an additional security layer to the system.

IEE is also presenting solutions for people counting and crowd management. The company's People Counter, based on 3D MLI Sensor technology as well, counts people and detects the direction of movement with more than 99% accuracy, even in high-traffic locations. Multiple people counters installed at different doorways generate precise input for building occupancy statistics, and can be used to support security or evacuation measures and demand-controlled ventilation (DCV).

About IEE

IEE provides people and object sensing solutions that enhance building safety, building security and building management. The Single Person Detector and People Counter applications are implemented in commercial, public and government buildings such as office towers, educational campuses, airports, banks, malls, movie theaters and museums. These solutions are based on innovative 3D MLI Sensor™ technology.

IEE is also a global leader in automotive safety sensing systems for occupant detection and classification, enhancing safety and comfort in vehicles for major car manufacturers worldwide.

Founded in 1989 and headquartered in Luxembourg, the company has operations in Europe, the U.S. and Asia. IEE employs 1,400 people worldwide. 20% of its workforce is engaged in Research and Development. For more information, please visit www.iee.lu.
